

VOLVO
164 TE

A rather plain symbol for a very exclusive car

This is the Volvo 164 TE, an even more exclusive version of our opulent Volvo 164 E which is ranked among the leaders in Europe with regard to safety, comfort and economy.

The 1974 Volvo 164 E has many attractive new features, most of which have the emphasis on safety. You can read more about these in our main brochure.

The very high standard of the Volvo 164 E is more than most people expect of a well equipped quality car. Despite this, we've gone one step further. And have built a car which gives you even more in the way of superb motoring enjoyment.

The "T" in its designation is the rather plain symbol for all the lavishness you get when you choose the new, very exclusive, Volvo 164 TE.

Rear seat head restraints

Fully adjustable in height and one for each rear seat passenger. Except in the centre, because rearward vision is also important.

Reading lamps

Two fully adjustable rear seat reading lamps with flexible arms are fitted for the convenience of your passengers. They give a very good light which does not dazzle.

VOLVO 164 TE

Air conditioning

Fresh, cooling air throughout the car. At exactly the temperature you prefer - irrespective of the weather.

Stereo 8 tape player and radio

Volvo's very popular Stereo 8 tape player and radio with four loudspeakers, two mounted in the front doors and two on the rear parcel shelf. Excellent reproduction even at low volume.

Headlight wipers and washers

Special headlight wipers and washers keep the new, larger, halogen bulb headlights clean and efficient.

Electrically operated radio aerial

Controlled from the driving seat, the aerial can be adjusted in height to give best reception. When not in use, it can be fully retracted. The aerial is mounted on the rear wing.

Inside knowledge

To really appreciate many of the advantages which make the Volvo 164 TE such a comfortable and safe car, you must experience them from the inside.

The doors, which open practically straight out. The very comfortable and easily adjustable front seats with luxurious leather upholstered seat facings. Driving seat height can even be adjusted with the driver seated and thermostatically-controlled heating elements in the cushion and backrest are a new feature.

The excellent all-round vision – even better this year. A sliding sunroof to enhance your motoring. Three square-feet of sunshine! Deep wall-to-wall carpeting. Inertia reel seat belts, safe and comfortable.

The practical oddments console between the front seats. And many other thoughtful features such as the courtesy light which goes on when any of the four doors are opened.

On the dashboard is a warning light for handbrake application, another lights up if a brake circuit should fail and a third, which we call a bulb integrity sensor, warns you if one of the dipped headlights, tail lights or brake lights should fail.

Power steering, an ideal steering ratio, the tight turning circle and the highly efficient heating and ventilation system, all need to be tried to be fully appreciated. So why not take a trial run in the new exclusive Volvo 164 TE.

Even the boot is special

The automatic boot lighting, the full carpeting, which also covers the spare wheel, and the spaciousness of this very large boot make an ideal finish to the Volvo 164 TE. A spare petrol can has been designed especially for this, the best of Volvos, and fits into the hub of the spare wheel.
