

## VOLVO 264 TE

### AN EXCLUSIVE CAR FOR REPRESENTATION PURPOSES

Volvo 264 TE is an exclusive car from Volvos 260-serie. This car is specially built for representation purposes, for example Government departments and embassies.

The Volvo 264 TE is powered by the Volvo V6 B27E engine made of light alloy which develops 140 h.p. DIN at 6,000 rpm, an automatic transmission of the BW55 type and power steering.

The body has been lengthened by 700 mm in front of the rear axle, (compared with the DL/GL-models of the 260-serie). The front doors are 1.020 mm wide and the rear doors 1,080 mm wide compared with 900 mm and 830 mm respectively for the 264 DL/GL.

The Volvo 264 TE has exclusive and very comfortable fittings. Two folding seats with safety belts provide the car with five comfortable passenger seats (excluding the driver). The front seats and rear seat are of the same basic design as in the Volvo 264 GL but the stuffing and the upholstery are new. The 264 TE is fitted with grey plush upholstery and the car has a dark blue finish. The head restraints on both the front and rear seats are covered with leather. The door panels are upholstered in plush and have fine wood inserts. Behind the wood inserts in the front doors there are two of the four loudspeakers in the car. Equipment includes a four-track stereo radio and a cassette tape-recorder as well as an electrically operated aerial.

There are electric window lifts for both the front and the rear door windows. These lifts are controlled by means of buttons on the centre panel. Furthermore, the rear windows can be opened and closed by means of buttons on the rear doors. The floor in the passenger compartment and the luggage compartment is covered with a soft fitted carpet.

The Volvo 264 TE has air conditioning as standard.
