Our famous seats have been replaced by seats that we comfortably believe, will be even more famous.

Volvo seats have always been justly noted for their luxury, as well as the orthopedic support they provided.

Our new reclining bucket seats are even better.

The frame and supporting materials were designed in cooperation with medical specialists, to give your frame the support it needs. Volvo engineers designed the adjustment controls that let you position the seat to your individual comfort.

Seating surfaces in the Volvo 164 E are upholstered in luxurious leather with matching vinyl trim. Colour selections include light blue, tan and black. If you opt for a sliding steel sunroof in Dark Green or new beige Metallic your seats are upholstered with brown crushed velour.

The 242 and 244 sedans feature cloth upholstery in either solids or stripes. For '75 the colour selection includes Burgundy, Beige, Brown or Blue stripe and Orange stripe.

Since the Volvo station wagon can get heavy duty use, the seats are upholstered in durable, easily-cleaned vinyl. Colours include Blue, Burgundy and Brown.
