THE POSSIBILITIES ARE ENDLESS

Imagine a car spacious, tough, dependable and so well planned as to be considered the ultimate load-carrying vehicle. A car designed to cope with the rigorous demands of your active life, offering unrivalled flexibility, whatever your carrying needs.

Whether you're taking your children safely to school, scuba diving in the Aegean Sea, or mountain climbing in the Alps, the versatility of the Volvo Torslanda is only constrained by your imagination.

Embodying Volvo's traditional reputation for safety and reliability, this durable car combines practical load-carrying capacity with rugged good looks and a 2 litre engine.

Raise the tailgate and it becomes apparent that the Torslanda is in a class of its own. A load capacity of 75 cu feet is at your disposal, by far the most generous of any car in its category. Folding rear seats, a low entry point and high roof ensure that the Torslanda is not only visually impressive but practical too. Add to this an optional auxiliary seat and you have capacity to carry 5 adults and 2 children (up to 25 kg/56 lbs for each child).

Safety is one of the key features of the Torslanda. Roll-over protection, crumple zones front and rear, and strong passenger compartment afford maximum protection.

Drive the Torslanda and you'll be struck immediately by its relaxed driving position and ergonomically designed controls, as well as its rugged feel and the power at your command.

Priced at £13,995, the Torslanda represents truly exceptional value for money.

ENVIRONMENTAL SAFETY

At Volvo we start thinking environmentally at the drawing board. Our concern about exhaust emissions began over 20 years ago, and we pioneered the development of catalytic converters. The Torslanda is powered by a 2 litre engine with a 3 way catalytic converter and Lambda Sond. This eliminates up to 95 per cent of hydrocarbon, nitric oxide and carbon monoxide emissions.

MANOEUVRABILITY

Solidly built with power steering for excellent road-holding and a turning circle of 9.8 metres; it becomes the ideal towing car.

STYLE

The classic shape of the car has been enhanced by the addition of roof rails, multi spoke alloy wheels, matt-black trim and specially selected colours: red, silver and white.

COMFORT

Reclining heated front seats with lumbar support, four head restraints, internally adjustable mirrors, a highly efficient heating and ventilation system for greater comfort and driving safety, together with central locking. The Volvo four speaker sound system rounds off this practical interior.

Options available:

Self levelling suspension, ABS, Airbag and choice of 3 colours.
