Tailor your car to your special needs

VOLVO 200 SERIES

Even in its standard form a Volvo is a car with an exceptionally comprehensive specification

But Volvo recognises that each Volvo owner is an individual, with his own personality and his own particular motoring needs. So Volvo has developed one of the best ranges of accessories offered by any car manufacturer, specifically designed for Volvo cars and produced to the same high quality standards.

In this leaflet we have illustrated a selection of the many accessories available for your 1979 model Volvo. If the items you need for your car are not shown here, ask your Volvo dealer. He will be pleased to give you full details of the many other Volvo accessories we simply didn't have room to include.
