

## Supplement to Owner's Manual VOLVO 164

A misprint has arisen in the 1973 edition of the above Owner's Manual.

The text on pages 21 and 36 concerning trunk lighting is incorrect.

The trunk light functions when the parking light is switched on.

### Replacing the bulbs for the license plate light

The license plate lighting is provided with two bulbs. Should any of them require replacing, proceed as follows:

1. Press in the tab catch in the bulb housing by inserting a screwdriver in the opening on the left-hand side of the housing. Pull the bulb housing out of its attachment.

2. Pull out the casing end not provided with a guide pin.

3. The bulb is now accessible for replacing. When fitting the unit, first insert the guide pins in the sockets and then press on the casing. Check that the rubber strip fits properly in position and press the damp housing securely into position.

Page 57

The following alteration has been made with regard to wheels and tires: The wheels have size 5 1/2 J 15" F.H. The tires are tubeless radial tires with size 175 R 15 or 165 R 15. With these tires, the maximum permissible speed is 115 mph (180 kmph). The alterations in tire pressure are made in the Owner's Manual on pages 67 and 71.
